A asks 50: served in full;
B keeps rising to 89
both ask 100
common level
≈ 70 MW each
0
50
100
served at bus 1002 (MW)
B asks 250, would get 89
= 36% < 50%
B is dropped and gets 0;
A keeps its 50
